

Locking Olecranon Plate - Improving Olecranon Fracture Surgeries

Siora Surgical Pvt. Ltd. is a renowned manufacturer and exporter of Locking Olecranon Plates and other orthopedic devices

The orthopedic industry has seen a lot of advancements in recent years in terms of improvements in the surgical procedures and betterment of Trauma Implants. Newer and better orthopedic devices have been introduced into the market with the efforts of many [Orthopedic Products Manufacturers](#) and concerned authorities. That has made treatment of even critical orthopedic injuries possible that was just a matter of discussion years ago.

Olecranon fractures are among those that can be treated with surgery using specially made Locking Olecranon Plates.

Our elbow is a hinge type of joint that is made up of three bones namely the humerus, ulna, and radius. Ligaments, muscles, and tendons also help support this joint by holding the bones together. Now, the break in the pointy bone of the elbow is known as olecranon fracture. Most commonly, it occurs as an isolated fracture but, in some cases, it could also be a result of more complex injury. A fall directly on the elbow or an impact with a solid object often causes olecranon fracture.

Mild cases of the condition can be fixed with non-surgical methods that may involve the application of a splint or sling followed by regular x-ray examinations to monitor healing progress. But serious cases require surgery where Locking Olecranon Plates may be used.

Siora Surgicals Pvt. Ltd. is a reliable manufacturer of Locking Olecranon Plate along with other orthopedic devices. With over 3 decades of experience in the industry, Siora holds expertise in producing a wide range of implants and instruments in stainless steel and titanium.

Locking Olecranon Plates are intended to be used for the treatment of fractures, nonunions, and osteotomies occurring in the olecranon region. They are specifically designed to support the joint after a fracture while allowing bones to heal properly. These plates are available in stainless steel and titanium along with different configurations.

Siora serves around 130 global distributors, and it keeps making efforts to increase these numbers. Currently, the company is looking to be counted among the best [Orthopaedic Device Companies in France](#) for supplying a world-class quality range of implants. The company is also a trustworthy OEM service provider across the globe. It also offers HA-coated implants on clients' demand.

The company owns an advanced production facility in the RAI District, Sonapat, Haryana where all the implants are manufactured. The manufacturing unit also contains a microbiology lab to check the bioburden on products and a cleanroom meeting ISO class 7 (10,000) guidelines to ensure contamination-free packaging.
