Category:Products introduced in 1974 Category:Radiation protection[Osteosarcoma of the ribs. Apropos of 2 cases]. Rhabdomyosarcoma can involve ribs with an atypical course that may be difficult to interpret clinically. The slow and progressive "classic" way, associated with a totally benign course, is rare. A painful enlargement of a thoracic rib, accompanied by failure to develop or to regress, requires a biopsy. In childhood, a malignant tumor may develop from interstitial tissue of a rib without any associated soft-tissue lesion. { "_args": [["ipaddr.js@0.1.5", "C:\\Users\\Administrator\\Desktop\\react-learning\\ode_modules\\sequelize"]], "_from": "ipaddr.js@0.1.5", "_id": "ipaddr.js@0.1.5", "_inCache": true, "_installable": true, "_location": "/ipaddr.js", "_nodeVersion": "0.12.2", "_npmUser": { "email": "juliangruber@gmail.com", "name": "juliangruber" }, "_npmVersion": "2.9.1", "_phantomChildren": {}, "_requested": { "name": "ipaddr.js", "raw": "ipaddr.js@0.1
