Q: Is `tf.nn.l2_loss` equal to `tf.reduce_mean(x*x + y*y)`? I have an array: `a = np.array([[5, 5], [6, 6]])` And I have another array `b = np.array([[7], [8]])` Is it possible to use the transpose of `a` and `b`, i.e. `tf.nn.l2_loss(a, b)` to get the same result as `tf.reduce_mean(a*a + b*b)`? A: You could use `tf.where()`: `import tensorflow as tf a = tf.constant(np.array([[5, 5], [6, 6]]), dtype=tf.float32) b = tf.constant(np.array([[7], [8]]), dtype=tf.float32) tf.where(tf.equal(a, b), tf.zeros(a.shape, dtype=tf.float32), a * a + b * b)` This will result in: `>>> a = tf.constant(np.array([[5, 5], ... [6, 6]]), dtype=tf.float32) >>> b = tf.constant(np.array([[7], ... [8]]), dtype=tf.float32) >>> tf.where(tf.equal(a, b), tf.zeros(a.shape, dtype=tf.float32), a * a + b * b)`

98/ME/NT/XP/2K/2003. União dos
Magistrados Brasileiros The União dos
Magistrados Brasileiros (UMB) (,
Union of Brazilian Magistrates), also
known as, "Centro Democrático de
Integração dos Magistrados do Brasil" (,
Democratic Integration Center of
Brazil's Magistrates) is a non-political
organization founded in 2008 by the

Brazilian Federal Court. Its main purposes are to provide a single point of contact for magistrates and to reduce fraud within the Brazilian judicial system by enabling magistrates, judges, prosecutors and defenders of the Brazilian legal system to have access to more accurate information, improve efficiency in investigations and increase the cooperation between judges.

Foundation The UMB was founded at the 66th Meeting of the "Masters of the National Court of Justice", held in Brasília on August 29, 2008.

Magistrates and federal judges (the Brazilian federal magistrates and federal judges are those who administer the Brazilian legal system) have the

power to request investigations and prosecution of particular people or cases, but at that time they had no single, central resource in which to turn to. According to the secretariat of the new organization, the establishment of the UMB was "inspired by the *Maior e Justiça* Justice Association d4474df7b8
