PagesFour is a user-friendly application designed especially for novices and passionate writers to compose stories, general notations, or poems. It comes lightweight without unnecessary add-ons, like macros, tables, or diagrams to complicate your work even more. Approachable and well-organized layout The offered interface is accessible and neatly structured with the current and all notebooks panels that can be closed at any given time, for a less cluttered look. On the right, the editor is displayed along with its components, while in the upper part, the toolbar stacks the most common commands, for quicker access. Optionally, the pages can be password protected, by enabling this action from the properties, and setting a new key from the Tools menu. Documents can be opened from the computer in DOC, RTF and TXT formats. Same types are applied for the Save function as well. Add and handle multiple diaries A useful option is the ability to have more than one notebook, which is shown on the left side of the window. There is nothing complicated about the process, just make a new journal, add as many sheets as necessary, and start typing. Text can be pasted directly from the clipboard, or imported from another source. In addition to the standard format options (font types, colors, sizes, styles), it's possible to align the content, increase the indent, insert bullet/number lists, as well as take snapshots of ongoing chapters, useful for re-editing. Check for mistakes and look up for terms Similar to Notepad++, the Spelling feature lets you choose the corresponding dictionary from several ones to best fit your written style. Plus, the app enables you to add specific words to the ignore list, and find synonyms using Thesaurus as the main engine. From the Tools tab, you can lock the journal, change the password, import and export the books, and manage other additional settings. In conclusion The bottom line is that PageFour is a reliable and intuitive program that comes in handy especially for novices and professional writers to easily compose and structure their books, and protect their work from being modified. Office Manager Professional is an assistant application for managing tasks, mail, appointments, files, tasks, and other items. The app can be attached as your desktop gadget. The software features various user-friendly filters, saving, and the ability to sync your cloud accounts. No need to be limited to Microsoft operating systems, as the application is also available for iOS and Android. The main components are: Task organizer The ToDo-list can be utilized to store your tasks that are assigned to a date, or include a reminder. The users may even view the list as a grid, or in list form, alphabetically. Also, the settings and filters can be modified. The application provides integration with various cloud services, such as: Gmail, Hotmail, Yahoo! Mail, Office 365, and Dropbox, to save and synchronize your files. Some cloud storage solutions can also be set to be synced. Search functions are available to locate the desired file, as well as scan a text from the document, email, or internet. Search also enables to save files or files on the desktop, as well as categorize the documents. The template builder helps the users to create a customized interface for arranging the information. Notebook The Desktop View tab allows you to include the ToDo-list, as well as the calendar. Calendar You may choose an optional recurring event, such as weekly, monthly, or annually. The details can be adjusted, and be stored in the calendar. Contacts The main purpose of this component is the outlook integration, which enables to view the contact details, share your contacts, and synchronize your address book. Tasks It includes the integrated calendar, and the option to set a due date, assign the task to a person, or assign a reminder. Appointments The list can be displayed in a grid, or in a list form. The appointment can be set to recurring, or included in the calendar. Clipboard The user can create folders, which are displayed by the tabs. The clipboard can be used to cut, copy, or paste the text from a variety of sources. Print To print the document, the users may select the printer and the paper size. Email The users can select the addresses and email messages, and compose a new one to be sent later. Contacts The contacts are arranged by default, however, they can be viewed by initials, or by name. It also includes the option to display in a list, or a grid form. Calendar The main window contains the calendar, which can be viewed by day, week, month, or year. By clicking the month/week icons, you may choose the option to add

## System Requirements:

The objective is to create balanced, easy to handle, complete, and interesting loadouts that can be easily customized for various games. These loadouts can include RPG class spells, vehicle upgrades, and main weapons. Each loadout can be complete or primarily pistols. This mod will try to make them realistic enough that they can even be purchased in shops. I will try to balance them with a few common classes and weapons so that they can be played with multiple classes. Installation: There are two main types of loadouts, or weapon kits. The first
