Biopharmaceutical Logistics Market Outlook, Growth Factors, Industry Share, Size by 2026| Straits Research

The pharmaceutical industry is dynamic and is likely to experience a high growth in the coming years. Today, growing sales of drugs and biologics, changing dynamics of the pharmaceutical industry, and stringent regulatory controls are some of the factors boosting the demand for pharmaceutical logistics services. Outsourcing logistics operations is trending in the pharma industry for cost optimization and technology advancement. Pharmaceutical companies are facing tremendous pressure for cutting down the cost of drugs and biologics. Thus, outsourcing logistics is one of the key strategies adopted by these companies to control their operational costs. The pharmaceutical revenue is expected to be tripled between 2017 to 2060, representing the growing demand for logistics services.

Global biopharmaceutical logistics market is expected to reach USD 131,554.1 million by 2026 from USD 82,564.8 million in 2018 at a CAGR of 6.2% during the forecast period 2019–2026.
