## About pregnancy termination pills

- Mifepristone and Misoprostol kit are the two main active ingredients in Mifegest kit online.
- Mifepristone used to prevent pregnancy growth by blocking the effects of the natural hormone progesterone on the uterus.
- Misoprostol kit is combined with Mifepristone to induce abortion. It contracts the uterus and pushes the pregnancy out, causing bleeding and cramping.
- Misoprostol softens the cervix and contracts the uterus, causing the pregnancy to be expelled. It is usually inserted vaginally or taken orally.

## How to reduce pain after taking early gestation ending pills?

Cramps and vaginal bleeding are common side effects of medical abortion process.

The most common side effects are nausea, weakness, fever, vomiting, headache, and dizziness. You can take painkillers to reduce pain. Don't take aspirin, it may cause your bleeding worse. Take a shower if you feel low. You can put a heating pad or hot water bottle on your belly to get some relief. Sit on the toilet for a while. Have someone rub your back it makes you feel good. This abortion process can be done at home so that you will get more privacy at comfort.
