How our Drug De-Addiction Psychiatrist Helps You in Recovery?

The Psychiatrist of Sharda Psychiatric Clinic will first analyze your condition and formulate a customized treatment plan for you. We provide the following treatment plans for Drug De addiction services.

- **Medications:** We provide medications for controlling withdrawal, stop cravings, control mood swings, anger, etc., to stabilize vital functioning.
- **Counseling:** The counseling will help you change your perspective towards drugs and also teach you coping strategies to cope with the urge to consume drugs. Moreover, We also counsel and train family members to handle drug abusing patients.
- **Drug Education:** Under this, you will learn about the potential harm drugs do to your body and why you should avoid their consumption.
- **Therapies:** Therapies play a crucial role in drug de-addiction by addressing the psychological, behavioral, and social aspects of drug abuse. Different types of therapies are often used like Individual Psychotherapy, MET- Motivation Enhancement Therapy, DBT- In Addiction with personality disorder etc., individually or in combination to help you overcome addiction.
- **Life Skills Training:** Under this type of training, our drug de-addiction psychiatrist will teach practical skills that will help you navigate daily challenges without turning to drugs and promote lasting recovery.
- **Care Giver Group:** A care giver group is created for patients to take care of their need.
- **Regular Follow Ups:** Even after providing the treatment we take regular follow ups with our patients to ensure they are living an addiction free life.
