SAFe Agilist Certification Training | SureSuccess Academy

In the ever-changing world of Agile methodologies, the SAFe (Scaled Agile Framework) Agilist Certification stands out as a must-have credential for anybody wishing to expand their understanding of scaling Agile across enterprises. **SureSuccess Academy**, a leading training provider, is glad to give comprehensive **SAFe Agilist Certification Training** in many locations around India. Our curriculum is designed to provide students with the knowledge and skills needed to manage successful Lean-Agile businesses.

Course Objectives:

The SAFe Agilist Certification Training at SureSuccess Academy seeks to:

Understand the Lean-Agile Mindset: Accept Lean thinking and Agile concepts for improving productivity and efficiency.

Implement Lean-Agile Leadership: Develop leadership traits that facilitate and propel transformation.

SAFe concepts: Understand and use SAFe concepts to increase quality, productivity, employee engagement, and speed to market.

Empower Agile Release Trains (ARTs): Learn how to manage ARTs and unite teams around a single business and technological purpose.

Facilitate PI Planning: Master the strategies for Program Increment (PI) planning and implementation.

Drive Continuous Delivery Pipeline: Learn how to enable DevOps and continuous delivery in the enterprise.

Course Content

Our comprehensive curriculum includes:

Introduction to SAFe: Overview and significance of SAFe in big organizations.

Adopting a Lean-Agile Mindset: The principles and ideals that drive SAFe.

SAFe Core Values: Understanding alignment, inherent quality, transparency, and program implementation.

Implementing Agile Release Trains (ART): Iterations and key performance indicators should be planned and executed.

Developing Quality in Lean-Agile Practices: Ensure quality with continuous integration, testing, and deployment.

Lean Portfolio Management: Aligning strategy and execution with lean budgeting.

Training Methodology:

Our training methods include:

Interactive Workshops: Sessions that are engaging and include practical activities and real-world problems.

Expert Instructors: Learn from SAFe Program Consultants (SPCs) with considerable industry knowledge.

Hands-on Activities: Learning may be enhanced by group activities, case studies, and simulations.

Study Material: Study materials include comprehensive manuals, worksheets, and access to internet resources.
