

7 Wood Cricut Projects: Unique Ideas and How-To Guide

I love creating [wood Cricut projects](#). Do you? Since my father was a professional carpenter, he had a plethora of tools in his garage, which I used to use to make small toys and things. Having been brought up in such an environment, I never thought that I would become a passionate crafter one day and create tons of projects using wood.

However, I do not create wood projects like my father used to. I use a special tool, a Cricut cutting machine. This tool is invaluable for every crafter; it was possible to create these wooden projects hassle-free.

So, the purpose of writing this post is to walk you through the different ideas that will help you easily create your own crafts without anyone's help. Whether you are a beginner or a professional crafter, you must look at these projects I created myself. Let's dive in!

- **Earrings**

If you are interested in making [wood Cricut projects](#), you should try making intricate earrings. I used veneer wood and cut it using a deep-point blade. This simple project can also be made using a Cricut Explore machine. Anyone who wears earrings will love this mini jewelry made out of wood. Start over your crafting with this beautiful wooden craft.

- **Coasters**

Want useful [wood Cricut projects](#)? Here it is — a wooden coaster! I always need a coaster on my desk, as I always mess up my table when I have tea or coffee. So, if you want your table neat and clean, then you

must give this a shot once. It is easy to create and takes less time. Try to make this wooden project on a machine that is compatible with wood.

- **Bookmarks**

JUST
ONE
MORE
CHAPTER

If you are an avid reader or know someone who is so, you need this bookmark. This wooden bookmark will not bend as easily as the paper bookmark. Therefore, I created this bookmark for my cousins and me. With crafting machines, creating **wood Cricut projects** is never daunting, and it assists every crafter in turning their imagination into reality.

- **Hanging Closet Divider**

SHIRTS &
BLOUSES

Want to organize your clothes in your closet? No worries — here is the solution — a hanging closet divider made of wood using a Cricut machine. I created it a few months ago because I was fed up organizing my clothes and finding them when I needed them the most. So, if you are also a crafter like me, you need to try this once.

- **Desk Organizers**

If you are wondering about **wood Cricut projects**, don't worry. There are a plethora of options available that you can try. For example, this desk organizer can be really helpful for crafters like us. I always need tools on time, and the inability to find them is frustrating. Therefore, I created a separate box using the wood. Painting them with the color of your choice can give them a fantastic look.

- **Puzzles**

Do you love solving puzzles? Whether you love them or your children, you can now use your cutting machine to create these wooden puzzles in no time. For these types of **wood Cricut projects**, you will need wood material up to 2.4 mm in thickness. However, on the wooden piece, you

have to paste a photograph that you want to make a puzzle of. Moreover, the best [balsa wood Cricut projects](#) you can ever try.

- **Keychains**

Have you tried making wooden keychains? No? It's okay. You should try it once, and it looks really amazing. The magical touch of the cutting machine will help you create an outstanding keychain that will always stand out. To create this, you need wood and some tools, including a cutting machine. After that, you can start creating designs by engraving and cutting.

FAQs

Question 1: Can I use a Cricut machine for wood projects?

Answer: Absolutely, yes. Cricut machines are capable of cutting wood without any hassle. This smart machine is designed to create a wide range of projects because it can cut wood up to a thickness of 2.4 mm. Cricut can cut different types of wood, including veneer, balsa wood, or basswood.

Question 2: What Cricut model is capable of cutting wood?

Answer: Cricut Maker 3 is the best machine for cutting wood hassle-free. This machine can cut wood quickly and accurately. Also, it is compatible with 300+ materials, from the softest paper to tougher materials such as matboard, leather, and balsa wood. In short, this machine is the best cutting machine for cutting wood easily.

Question 3: Can I engrave on wood using a Cricut machine?

Answer: Yes, it is possible to engrave wood using a Cricut Maker machine. You need to add an engraving tip designed for engraving purposes. With Cricut, however, you can engrave soft and tough wood, as well as materials such as acrylic and soft methods. Mostly, balsa wood is taken into practice for engraving the soft material.
