

# How to Make 3D Flowers With Cricut: A Stepwise Guide

Do you like 3D flowers? Do you admire those beautiful paper flowers and wonder how you can create them yourself? If your answer is yes, then you have reached the right place for the answer. In this blog, I am going to show you [how to make 3D flowers with Cricut](#). By following this guide, you will be able to create many lovely flowers for your decorations.

With a single tutorial, you can make 10 different types of flowers. These flowers are great for party decor, custom cards, spring decor, Mother's Day, weddings, and many more. You will use the Design Space app, which has all the designs. You can cut your materials into various shapes to create these beautiful flowers. So, what are you waiting for? Let's dive into this post to get started.

## What Do You Need to Create Personalized Flowers?

To make these cute flowers, you will have to know [how to make 3D flowers with Cricut](#). But before that, it is also important to know what tools and supplies you are going to need.

- Cricut machine: You will need a machine to cut designs on your paper. You can use almost all machines, including the Cricut Maker, Maker 3, Explore 3, Explore Air 2, and others.
- Design Space: You need the app to pick the design from the app and then operate on your machine to cut it on the app.
- Cardstock paper (12" x 12"): This paper is good for making flowers. One flower will take a complete sheet of paper, so you have to be prepared.
- Quilling tool: It helps the paper roll and transform into a flower.
- Hot glue gun: This is used to glue the flower at the bottom after wrapping it. It helps to give the flower proper stability.

## How to Make 3D Flowers With Cricut: 4 Simple Steps

Now, all the required materials are available for your paper flower. Follow this easy tutorial to create custom flowers for yourself in the easiest way with the help of Cricut!

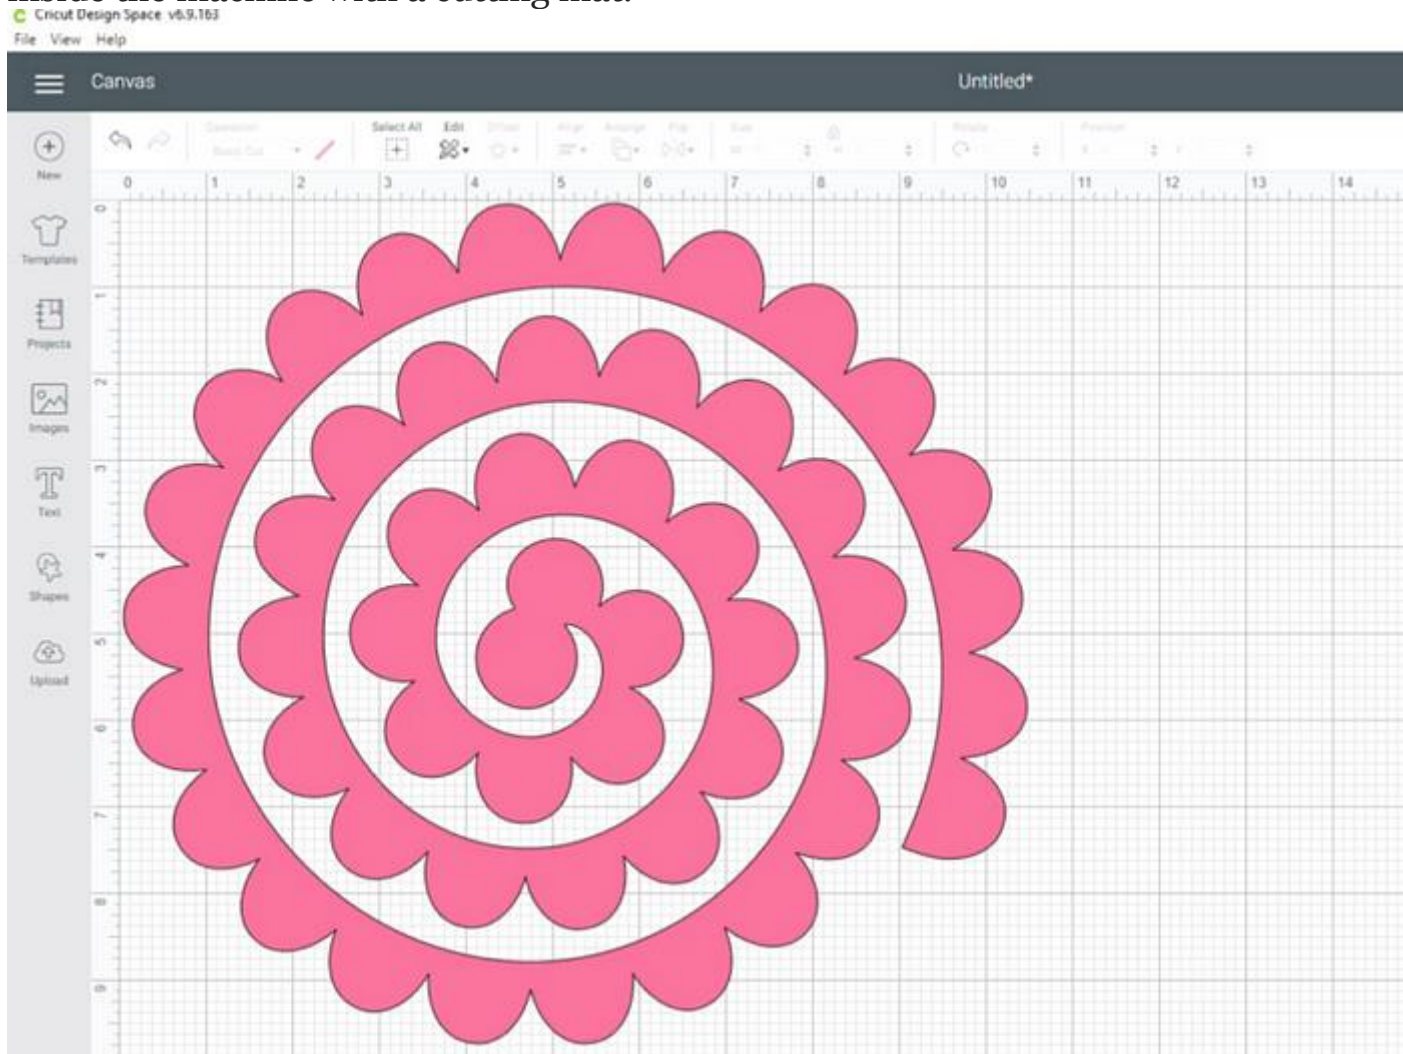

## Step 1: Select a Design in the Cricut Application

To make flowers, you have to start the process using the Design Space app. After that, go to the software and then click on the New Project section. Next, you should click on the Images option and type “3D flower.” There, you will have 10 flower templates, and you must select one. Now, you need to cut the design on your Cricut machine.

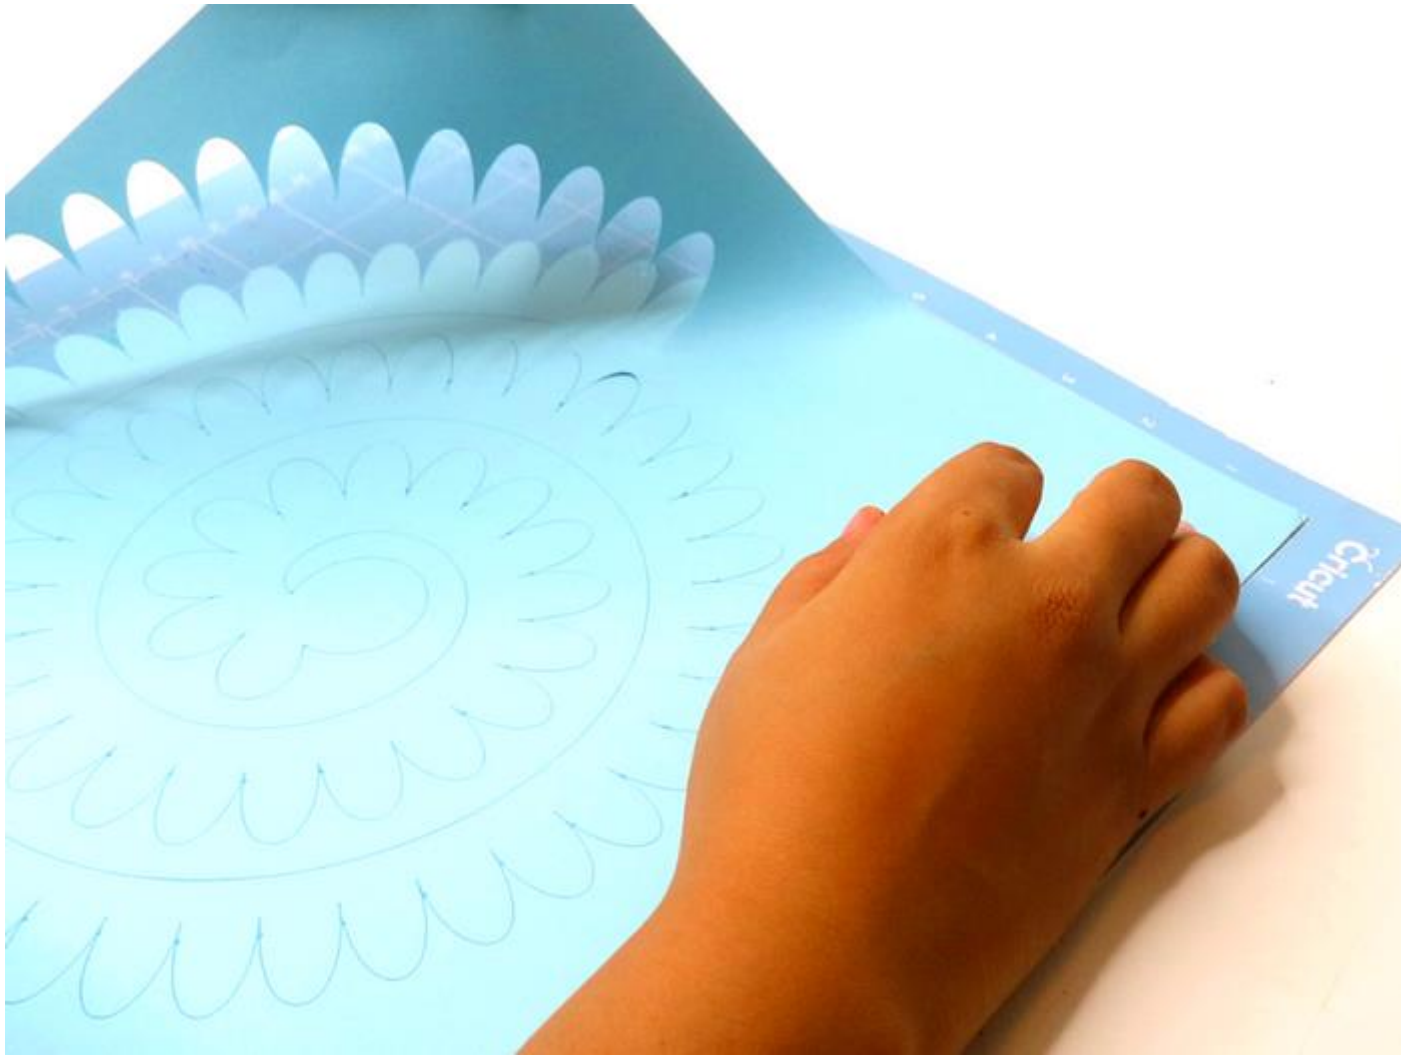

## Step 2: Cut the Design on Your Cricut Machine

Once the design is ready, take a 12” x 12” cardboard paper and put it inside the machine with a cutting mat.

Before cutting the paper, you should make sure that you have set the design to 10.5” so that it gets cut well on the paper. Also, you will have to set the material to Cardstock. Once everything is ready, click Make It, and your machine will start cutting the design. Once the design is cut, press the Unload button and remove the material.

Now, you have to remove all the unnecessary particles from the material. Then, gently remove the flower design from the Cricut mat.

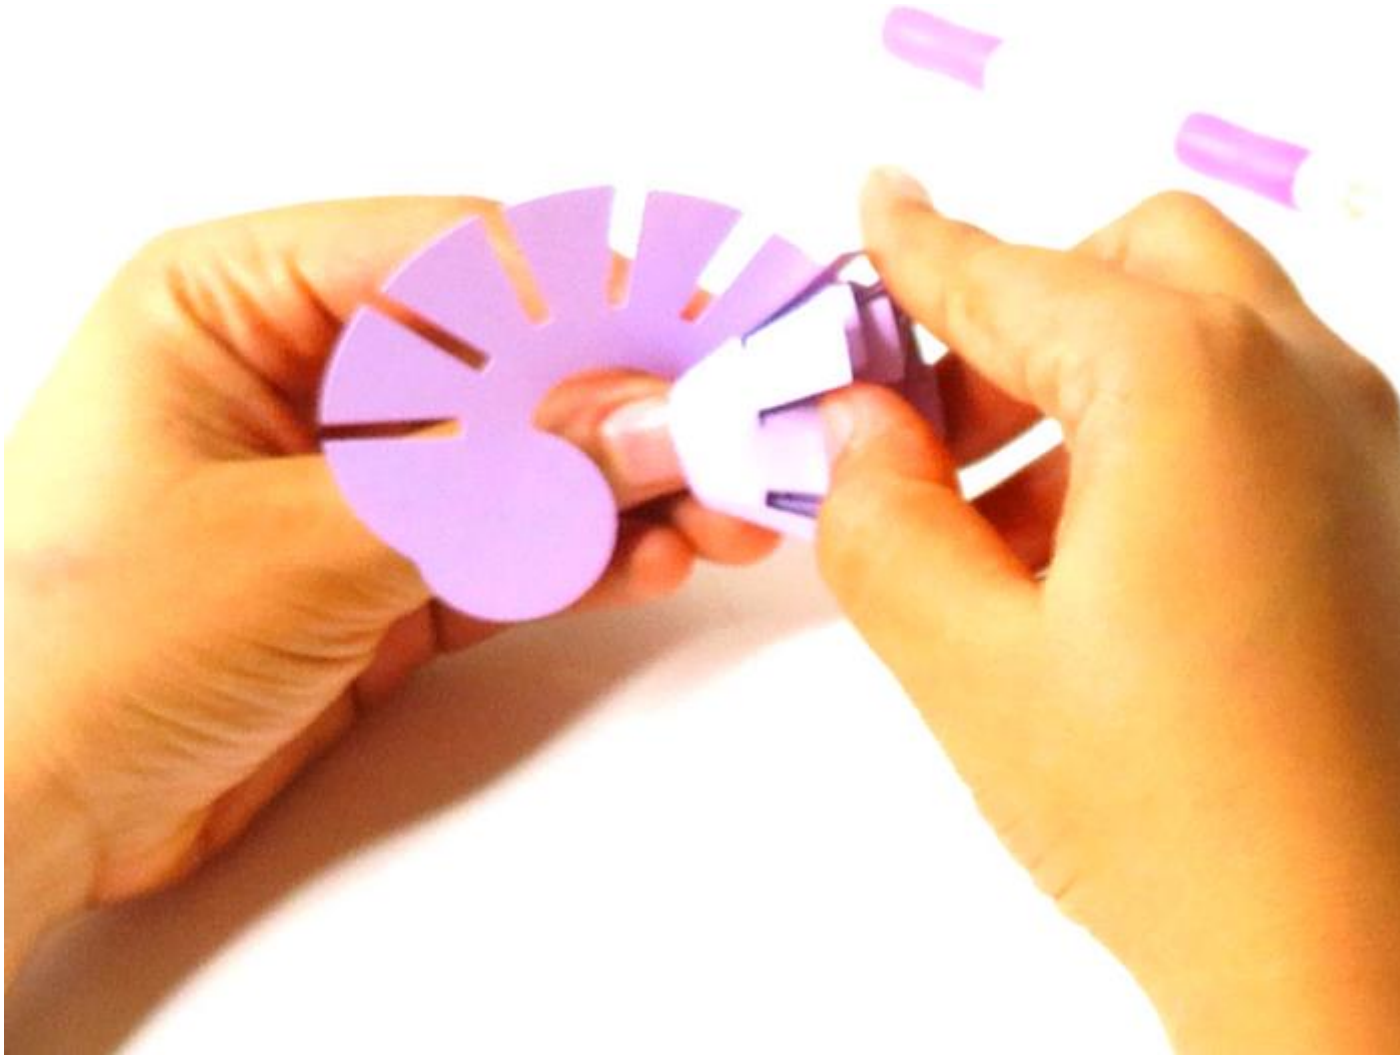

### **Step 3: Assemble the Flower**

Once the design is cut on the machine, you have to assemble it into a flower shape. The best tool for this is the Quilling tool (shown in the picture below), where you see an embossing stylus. Now, you have to start rolling the paper in the counterclockwise direction.

Keep rolling the design until the end, making sure you wrap it tightly.  
You should keep the bottom of the flower even.

**Step 4: Glue the Flower**

When the wrapping part of the flower comes to an end, you have to glue the flower at the bottom of it. For this, you have to use a hot glue gun. You have to hold the gun on the flower for around 3 seconds and ensure that it sticks the flower well. The end result of the flower will look like this.

## Conclusion

Here, you read about [how to make 3D flowers with Cricut](#). To sum up, creating custom paper flowers with Cricut machines is not difficult if you know the right things to do. After reading this blog, you know that you need certain tools and supplies to make flowers with Cricut. Once you have them all, you can follow the basic steps, and your beautiful paper flower will be ready. You can use these for multiple purposes, and it will enhance the beauty of your place.

## FAQs

## **What Cricut Tools Do I Need to Make 3D Flowers?**

To make flowers with Cricut, you need a few tools and accessories. The first thing you need is a Cricut cutting machine, which cuts the design for the flowers. Other things are a phone or computer, a Cricut Design Space app installed, cardboard paper, a quilling tool, and a hot glue gun.

## **What Paper Do I Need for 3D Flowers?**

You can use many pieces of paper to make flowers with paper, but cardstock paper is considered to be ideal for it. It has the perfect heaviness and thickness that will make it great for flowers. If you use a lighter material, the flow will lose its shape immediately after transforming it into the machine. If the paper is thicker, it will become difficult for it to fold and transform into a flower.

## **Can I Cut Paper Flowers With Cricut?**

Of course, you can cut! The Cricut is an ideal machine for cutting materials for DIY projects. You can cut your cardstock paper on any of the Cricut machines and turn it into a beautiful flower. Almost all the machines are good for cutting paper for flowers, but considering the small size of your Cricut Joy, it will not be a good option. Other machines include the Cricut Maker, Maker 3, and Explore 3 machines.
